

Experience Microsoft Surface

WHAT IS MICROSOFT SURFACE?

Microsoft Surface™ a revolutionary surface computing platform that responds to natural hand gestures and real world objects, helping customers interact with technology in a way that is simple, intuitive—and unprecedented. Using this innovative technology, multiple users can manipulate and maneuver digital content, drive specific interactions with objects, and allow for devices to connect and engage with Microsoft Surface. The 360-degree user interface invites individuals and groups to discover and interact with technology in a way that helps inspire cutting-edge, engaging experiences and transactions that differentiate your business.

WHAT MAKES MICROSOFT SURFACE UNIQUE?

Direct Interaction. Customers will benefit from Microsoft Surface instantly. Interacting with content is natural, simple, intuitive, and fun. Users can actually “grab” digital information with their hands—interacting with content by touch and gesture.

Multi-Touch. Microsoft Surface revolutionizes the idea of surface computing. Microsoft Surface recognizes many points of contact simultaneously—not just from one finger as with a typical touch-screen. Your customers can use both hands to reach and interact with dozens of items at once.

Multi-User Experience. The 30-inch diagonal display and horizontal Microsoft Surface creates a unique, branded gathering place where multiple users can collaboratively interact with data—and each other.

Object Recognition. Microsoft Surface sees what touches it and can recognize real-world objects, providing the potential for a multitude of applications and transfer of information between devices.

HOW CAN IT BE USEFULL TO SCHOOLS?

Assist special education needs students.

Build students team-working, collaboration, and creativity skills.

Improve student’s personalised learning and skills assessment.

Xface

Your Success, Our Pride.

<http://www.xface.co.uk>

WHAT IS EDUCATIONAL SUITE 1.0?

Our Educational Suite 1.0 is a collection of Surface apps that targets individual needs of the schools. We also follow the national curriculum.

Foundational Pack: This pack consists of several applications that help students to interact with each other in a fun loving environment. The apps include sequencing, fine motoring, talk about picture, same difference, word games.

Personal & Emotional Skills Pack. This pack will help develop children's self-awareness, empathy, social skills, motivation and managing feels. Supports SEAL format.

Special Needs Pack. This pack has been developed keeping Special needs students in mind. Our ground breaking approach will enhance the Special need schools/ colleges to meet their individual requirements. We also support AQA and ASDAN format.

Team Skills Pack. This pack helps students to build team working and collaborative skills in various ways. Storytelling, Numeracy, Literacy, Painting, Card Games, Memory Mapper.

Student Portfolio. This application is aimed at senior students who can socially interact with others confidently. This application builds a portfolio about the student during his/her stay in the school. This is oriented towards self-sufficient nature of the student.
