

The Always Integrated & Always Connected Retail Store Solution

Information is plentiful. The challenge for retailers is sifting through it, extracting value, and using the results to create effective strategies. To succeed, retailers need immediate access to key data. They need the tools to share knowledge and collaborate in real time. Retailers spur productivity growth by using IT to gain accurate insight into business conditions, to support innovative ways of solving customer problems, and to evaluate and redesign core business processes.

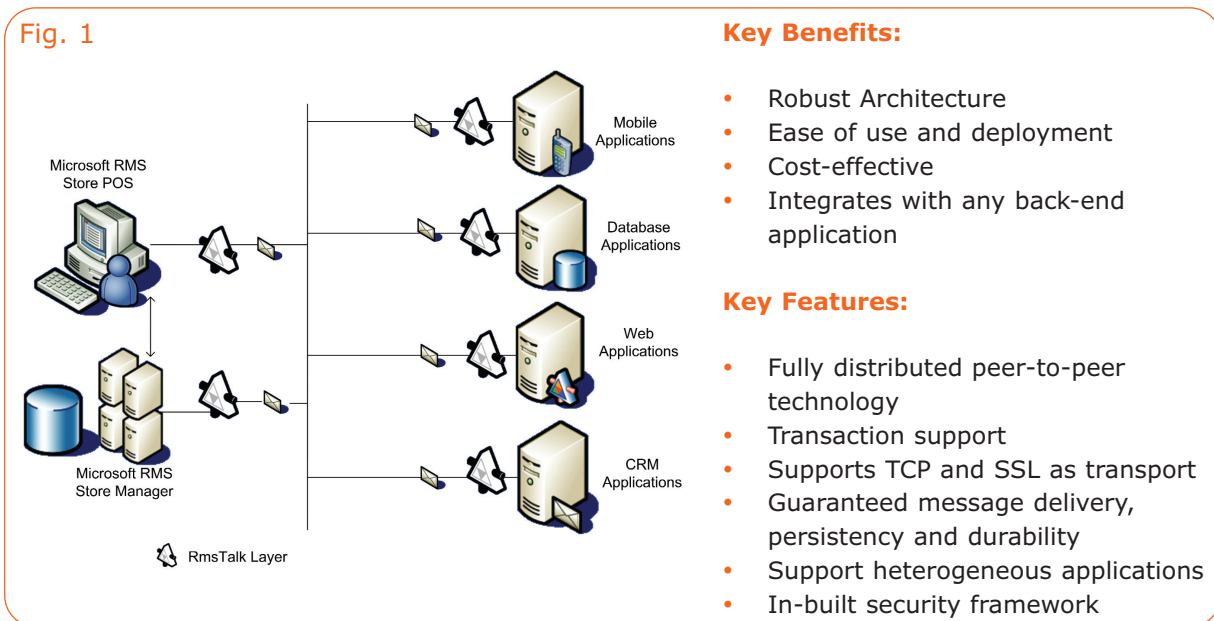

RmsTalk

 Integrates Microsoft Retail Management System and Microsoft Dynamics CRM

With these messaging and collaboration solutions you can seamlessly connect people, information and business processes to improve individual, team and organisational productivity.

RmsTalk : Makes Microsoft RMS "talkative"

RmsTalk is a lightweight, highly scalable messaging layer specifically designed for Microsoft Retail Management to integrate application data across the extended enterprise from desktop to enterprise-level applications like Microsoft Dynamics Axapta, Sage, e-Commerce etc.

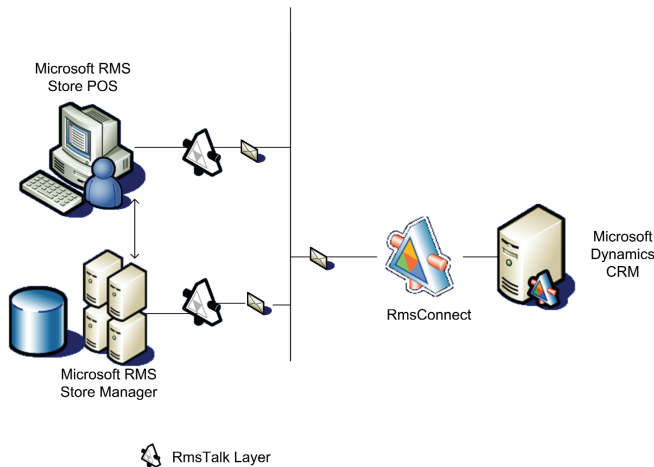

RmsConnect : Always on, always connected

RmsConnect is built on RmsTalk technology as the core. RmsConnect is Xface's implementation for integrating Microsoft Retail Management System and Microsoft Dynamics CRM.

Note: RmsTalk automatically included when you purchase RmsConnect
